Buy and Sell stock nationally

We are invested in our environment
and connected to our community.

— Welcome —

Our vision at Trio Angus is to be a holistic seedstock business that is invested in our environment and connected to our community.

We are a family operation, devoted to producing high quality, grass-efficient Angus genetics. We strive to do this in a way that benefits the health of all the parts of our operation. This includes our land, our cattle, our clients, our community and our family.

We truly believe in the importance of what we do. We've successfully used genetic improvement to increase our own productivity, profitability and sustainability, and because of this we're committed to helping others do the same. If you'd like your Angus genetics to better suit your environment, we encourage you to look at the 60 bulls on offer in this catalogue.

Our bulls are backed by a cow herd that's managed in a strict planned grazing system, with very minimal inputs. They're also backed by a

program that focuses on the natural aspects of animal form and function, rather than science and figures. We know our cattle and can see what type of animals are thriving right here at Cassilis, to us that's invaluable. To quote Roger Payne, Biologist - 'Any observant local knows more than any visiting scientist. Always. No exceptions'.

The bulls we have on offer at our sale this year demonstrate what we're aiming to achieve. That's why they wear the Trio Angus brand.

We welcome you to come and inspect the bulls, we'd also love to learn about your program and how we can work together.

If we can help or answer any questions please reach out.

Matt & Shell

– Sale information –

Sale date

Our sale will commence at 1.00pm on Thursday 24 August, 2023. Bulls will be penned for inspection from 10.00am.

Location

Our Sale will be held on-property at 'Ingleburn', 6914 Ulan Road, Cassilis NSW. From Cassilis, travel 10kms west on the Golden Highway, turn left onto the Ulan/Mudgee Road, 'Ingleburn' is 2.5km on the left (see map on Page 7).

Selling System

The sale of bulls will be conducted under normal auction conditions. Buyers must register prior to sale commencement. All bulls are sold GST exclusive. Successful purchasers must give written advice regarding payment and transport arrangements at the conclusion of the sale.

AuctionsPlus

The sale will be interfaced with AuctionsPlus. New users please register with AuctionsPlus 24 hours before the sale if you wish to bid online.

Outside agents rebate

A rebate of 2% will be payable to agents who introduce their clients in writing 24 hours prior to the sale and attend the sale with or on behalf of their clients and settle within 7 days. A rebate of 1% will be payable to agents who introduce their clients in writing prior to sale day and settle within 7 days, but do not attend the sale. Please email introductions to info@trioangus.com.au.

Health and fertility

The bulls are ready for immediate use. They have been:

- Semen tested
- Tested Pestivirus free
- Vaccinated with 7 in 1
- Vaccinated for Vibrio
- Drenched with Cydectin Platinum

Our herd is Johnne's Beef Assurance Score (J-BAS) 6.

Management

The bulls have been running in their two respective age groups. They've been grazing a mix of native and improved pastures and forage oats.

Insurance

There is no vendor insurance on the bulls. We encourage buyers to insure their purchases, especially those that aren't getting picked up on sale day. Various insurance options will be available on the day.

Inspection day

Bulls will be penned for inspection on Friday 11 August, 10.00am to 4.00pm. Refreshments available all day.

Parent verification suffixes

After each bulls name, you will notice a suffix. This indicates the DNA parent verification that has been conducted. SV means 'Sire Verified'. PV means 'Both Parents Verified'. # means 'DNA verification not conducted', or results not available at time of printing. Most bulls in this catalogue have been at least Sire Verified for pedigree integrity.

Bull warranty

All bulls are sold as fertile and capable of natural service. If, within 6 months of sale, a bull should breakdown due to reasons other than injury, misadventure or negligence, Trio Angus will provide you with a satisfactory replacement if available, or issue you with a credit equal to the purchase price minus salvage value. This credit may be used to purchase a bull from Trio Angus within the next two years. Any request for replacement/refund must be lodged with the vendor within six months of purchase and be accompanied by a current vet certificate.

Safety disclaimer

All of the cattle are quiet to handle under normal conditions. However, there are always risks associated with handling cattle. Visitors enter the cattle pens at their own risk.

Children must not enter the pens under any circumstances. The vendor accepts no liability for accidents that may occur at the Trio Angus sale or whilst on the property.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Delivery options

FREE DELIVERY TO MAJOR CENTRES

Trio Angus will arrange free delivery to Mudgee, Scone, Dubbo and Gunnedah. Onward freight arrangements from these points will be the buyers responsibility. Delivery will take place in the week following the sale.

TAKE YOUR BULL HOME ON SALE DAY

Bring your own truck, or organise a carrier, so you can take delivery of your bull on sale day.

INSURANCE

Like always, we will take all care to look after your bull after the sale, but no responsibility can be accepted whilst awaiting delivery. Various insurance options will be available on sale day and are recommended.

PLEASE NOTE *

Your selected delivery option must be indicated on your buyers delivery slip at the conclusion of the sale.

“On our farms we use cattle as a tool to help improve the ecological health of our landscape. An outcome of this is a breeding herd with genetics that thrive under holistic management.”

TRIO ANGUS

– Bull Inspection Day –

YOU'RE INVITED TO JOIN US ON
Friday 11 August 2023

Our Bull Inspection Day is a great opportunity to have a look at the bulls and come up with a plan for sale day. We'd also love to chat with you about your requirements and learn more about what you're looking for.

THE BULLS WILL BE PENNED FROM 10.00AM – 4.00PM

Call in on the day whenever it best suits and look at your own pace. For those who would like to have a chat and get some added guidance, please don't hesitate to get in touch and we'll put some time aside specifically for you.

Refreshments will be available all day.

Unsure if you can make our Bull Inspection Day?
Take a look at videos of each bull on our website:

www.trioangus.com.au/bull-sale

– How to find us –

TRIO ANGUS IS LOCATED 12KMS SOUTH WEST OF CASSILIS.

From Merriwa/Cassilis

On the Golden Highway travel 10km past Cassilis then turn left on to the Ulan/Mudgee Road. We are located 2.5km along the Ulan/Mudgee Road on the left.

From Coolah

Follow Cassilis Road to the Golden Highway. Turn left and travel along the Golden Highway. Turn right onto the Ulan/Mudgee Road. We are located 2.5km along the Ulan/Mudgee Road on the left.

The Trio temperament

- Docility is a key focus of our breeding program. Working with quiet cattle not only makes the job safer and easier, but it also makes it a lot more enjoyable!
- ✓ We genetically select for good temperaments.
 - ✓ We use low stress stock handling. This teaches the animals how to respond to pressure and allows them to be worked in a calm manner.
 - ✓ We expose our bulls to as much as possible to prepare them for their new homes.

Our grazing system

We've worked with grazing consultant, Dick Richardson, for seven years now. He's taught us alot about how to better plan our grazing to ensure we improve the soil health, plant growth and also animal performance.

It's a continual learning process, but we now follow a modified version of the Venter-Drewers Grazing System. This is a type of cell grazing that incorporates 'Priority' and 'Sabbath' paddocks.

Bull preparation

The bulls in our sale have never been fed grain. Our opinion is that cattle are designed to eat grass, not grain, so where possible that's what they should do.

We believe that if our bulls are eating what they're been naturally designed to eat, it can only be beneficial for their fertility and overall health.

– Using EBV Percentiles –

MAKING IT EASIER TO PICK THE RIGHT BULL

Selecting the right bull for your business needs to be as easy as possible. So we've incorporated percentiles into our catalogue as an extra tool to help you.

A percentile value allows you to see where an animal sits in the breed for each trait. This gives you more information than an EBV figure alone. Eg. If an animal sits in the 30th Percentile for 600D it means he's in the Top 30% of the breed. Generally, the lower the percentile figure the better, except in the case of Mature Cow Weight where being the biggest isn't always the best.

TRIO FRED N1					
TACE <small>Top Australian Cattle Exchange</small>	600	EMA	RIB	RUMP	IMF
EBV	90	4.5	2.3	2.3	2.1
PERC	30%	55%	5%	5%	5%

The 600D of this bull sits in the 30th Percentile, meaning he's in the top 30% of the breed for this trait.

The IMF of this bull sits in the fifth Percentile, meaning he's in the top 5% of the breed for this trait.

Five Steps for buying better heifer bulls

Want to buy a great heifer bull?
Follow these simple steps to pick the right bulls and bid with more confidence and less stress on sale day.

These tips will help you get the bull selection right for an improved calving, but good heifer management plays a key role. As a rule, genetics account for 40% and the environment accounts for the other 60%. At Trio Angus, we work hard to get the genetics right, it's then up to you to control the environmental effects to the best of your ability. Ensuring your heifers are well grown by the end of the first trimester is vital.

Good genetics, combined with good management, is the key to a profitable and stress free calving season.

1 Look at the structure of the bull

The bull's shoulders are an important aspect to check. Smooth shoulders promote an easy calving. The shoulders should be smooth against the rib cage. We find an easy way to assess this is to stand at the front of the bull and look at the top of his shoulder blades.

✓ BULL A has less width at the top of the shoulder and at the point of the shoulder.

2 Assess the bull's physical size

It's important to think about the bull's physical size. A heavy, mature bull may not be ideal for joining smaller heifers. We find yearling bulls work well over heifers, as they are similar size and reduce the risk of injury.

3 Look at the Birth Weight EBV

The Birth Weight EBV reflects the weight of the calf at birth, so it makes sense that a lighter calf is preferred. This means a lower Birth Weight EBV should be selected. Currently the breed average Birth Weight EBV is +4.1, so we suggest selecting a birth weight at or below this figure.

✓ BULL A has the best Birth Weight EBV for calving ease (lower figure).

Note: Calving Ease EBVs are also a great tool, however most sale bulls do not have an EBV of high enough accuracy to be useful.

4 Look at the Gestation Length EBV

The Gestation Length EBV is the number of days from conception to birth. Calves that are born a few days early are smaller. A negative Gestation Length EBV is ideal. Currently the breed average for Gestation Length EBV is -4.8, so any figure below this is good.

✓ BULL A has the best Gestation Length EBV for calving ease (lower figure).

5 Take note of the pedigree

A bull's pedigree can give an indication of how reliable his calving ease will be. Stacking multiple generations of calving ease provides more reliability, meaning less chance of a 'throwback' to larger calves. Look in each bull's 'Comments' in the catalogue for insights.

This bull is a great reflection of what we're trying to achieve here at Trio Angus. We want to breed cattle that are efficient grass convertors and easily maintain their body condition. This bull certainly ticks those boxes. He has a great combination of masculinity and softness, all on a moderate frame. Everything is balanced and that's why he catches your eye every way you look at him.

The first Te Mania Qalcine son in the sale and a cracker at that! He's a bull we thought hard about keeping as his phenotype and data makes him very versatile. He's deep-girthed which many say is an indication of good foraging ability. He's also already carrying some body condition, which shows how easy-keeping he is. This bull is an exciting prospect for anyone chasing grass efficient genetics.

Trio Angus 100% grass fed

It’s nice to have our freezer full of our own grass-fed beef again.

It’s rewarding to be able to produce such high quality and nourishing food right here on our farm.

The cut pictured was from a heifer sired by Holbrook. So if you buy a Holbrook bull off us be sure to keep one of his progeny for your own freezer!

Thanks to the Black Stump Butchery, Coolah for their service processing our cattle.
